The Israeli forces force the Alqurmi Neighborhood people in Jerusalem (al-Quds) to leave their homes for Judaization

Costs of restoration of endangered buildings for demolition: 900,000 Euros

On Wednesday evening 09/11/2013, the occupation authorities released an order to evacuate the Alqurmi Neighborhood people from their homes within thirty days. The pretext was their safety after the Israeli Judaized machine tunned under the neighborhood. Those tunnels caused cracks in the houses of more than thirty low income families who cannot afford the expenses for repairing their houses. Hence, their houses would under the threat of being demolished and the people would be subject to deportation. As a result, this would lead to the success of the occupation's Judaization schemes which are designed to weaken the Jerusalemite community by forcing Jerusalemites to leave their city.

This issue demands us all to take action and defend our Jerusalem with all our capabilities. We plead you to act soon to ease the suffering of our Jerusalemite people in Alqurmi Neighborhood and support them by working on restoring the buildings under the threat of demolition. Its rehabilitation requires an amount of 900,000 Euros.

Supporting and facilitating this work would contribute in preserving the Arab Muslim identity of Jerusalem and letting its people remain the first and last defenders of the Muslims' first kiblah where the Prophet Muhammad , peace be upon him, traveled to .

Yours Sincerely ,

Mohamed Makram

Director of Alquds Foundation Malaysia
